Important Notice to Purchaser!!!

All statements, technical advice and recommendations contained herein are based on tests believed to be reliable, but the accuracy of any/all warranties, expressed or implied, Seatchute, LLC disclaims any liability for damages, direct or consequential, including personal injuries, resulting from a malfunction or defect in design, material, workmanship or manufacturing, whether caused by negligence on the part of the parachute manufacturer, Seatchute, LLC or otherwise.

Before using this harness and container assembly, or allowing it to be used by others, the purchaser shall determine the suitability of the product for his/her intended use, and the purchaser assumes all risk and liability whatsoever in connection therewith.

Your original signature waiving liability on the part of the parachute manufacturer and Seatchute, LLC including full payment is required to process and complete your order. Purchaser hereby waives any/all liability on the part of the parachute manufacturer and Seatchute, LLC and understands that this Emergency Parachute System and/or harness and container are sold without known faults and defects, without any warranty for any purpose whatsoever.

Seatchute, LLC Agreement to Inform-

Seatchute, LLC agrees that it is our responsibility and duty to inform all customers of the unavoidable danger associated with the risk of parachuting, and we agree to recommend and sell Seatchute, LLC products only to customers who have been informed of the following risks and responsibilities:

Risks of Parachuting...

- * Parachuting can cause serious injury or death.
- * According to 1990 U.S. Parachute Association statistics, 0.9 fatalities occur for every 100,000 sport skydives.
- * Parachutes do not always open properly. Parachuting equipment can fail even when all possible precautions are taken by you, the equipment manufacturers, and everyone else involved with your parachute.
- * Failure to activate your parachute or execute emergency procedures at a safe altitude, and/or equipment failures can result in serious injury or death.

In Addition, it is also the Users Responsibility to:

- * Receive proper training before using any parachuting equipment.
- * Be extremely careful, cautious and prepared. Read and understand all owner and operation manuals for your Emergency Parachute System.
- * Thoroughly inspect all parachuting equipment before each use.
- * Review emergency procedures before each use.
- * Check equipment warnings – do not exceed limitations. Never violate the training and experience requirements for the specific equipment in use.
- * Completely understand that, despite all precautions, parachute use is dangerous and can result in serious injury or death.
- * Never allow others to use, rent or purchase parachute equipment without first making sure that they are aware of the risk and responsibility, and are completely familiar with the equipment, and are trained in the use of the equipment.
- * Completely understand the maximum gross weight per system is 220 lbs.

* Seatchute MUST be used solely for Emergency Escapes above 500 feet ONLY *
